Subject: Approval of SATAjet RP and SATAjet RP Digital 2 spray guns

Dear Sirs:

Per your request, this letter serves as approval for use of the subject spray guns in Santa Barbara County. This equipment may be used in accordance with APCD Rule 339.D.7.f, based on South Coast Air Quality Management District's (SCAQMD) November 25, 2003 approval letter to SATA.

Consistent with SCAQMD's conditional approval, the APCD's approval is based on the following conditions:

1. SATA Farbspritztechnik GmbH & Co. KG shall supply written notification with each SATAjet RP or SATAjet RP Digital 2 spray gun sold or distributed for use within the jurisdiction of the Santa Barbara County Air Pollution Control District that the spray gun is only approved for the application of coatings subject to rule 339.D.7.f.
2. This approval is only valid if the air pressure supplied to the SATAjet RP and the SATAjet RP Digital 2 spray guns is equal to or less than 35 psig. SATA Farbspritztechnik GmbH & Co. KG shall supply written notification with each SATAjet RP or SATAjet RP Digital 2 spray gun sold or distributed for use within the jurisdiction of the Santa Barbara County Air Pollution Control District that the maximum air pressure supplied to the spray gun shall not exceed 35 psig.
3. SATA Farbspritztechnik GmbH & Co. KG shall supply a Sata air micrometer with gauge 0/8455 (product number 27771) modified to clearly identify the maximum allowable spray gun inlet air pressure with each SATAjet RP spray gun sold or distributed for use within the jurisdiction of the Santa Barbara County Air Pollution Control District. The required modification shall provide a visual confirmation that the maximum allowed air pressure is 35 psig such as color coding the gauge to make the area of the gauge at and below 35 psig green and the area of the gauge above 35 psig red or other design approved by the Santa Barbara County Air Pollution Control District. SATA Farbspritztechnik GmbH & Co. KG shall supply written notification with each SATAjet RP spray gun sold

or distributed for use within the jurisdiction of the Santa Barbara County Air Pollution Control District that the Sata air micrometer with gauge 0/8455 (product number 27771) modified as described above shall be attached to the spray gun and be in good working condition whenever the gun is in operation.

4. This approval is only valid if during actual operation the SATAjet RP spray gun is equipped with a properly operating Sata air micrometer with gauge as described in condition number 3.
5. SATA Farbspritztechnik GmbH & Co. KG shall add a clearly visible permanent label specifying that the inlet air pressure shall not exceed 35 psig to all SATAjet RP Digital 2 spray guns sold or distributed for use within the Santa Barbara County Air Pollution Control District.
6. This approval is only valid if during actual operation of the SATAjet RP Digital 2 spray gun is labeled as described in condition number 5.
7. This approval is only valid for the SATAjet RP and SATAjet RP Digital 2 spray gun model tested.

If you have any questions regarding this approval, please call me at (805) 961-8827.

Sincerely,

Peter Cantle  
Manager, General Source Division
