

SATAmijinjet® 1000 K

German Engineering

Spray Guns | Cup Systems | Breathing Protection | Air Filtration | Accessories

The "compact" industrial gun

- Compact and lightweight (only 10.1 oz.) industrial gun for special coating jobs
- Low air consumption
- High material transfer rate due to optimized technology

SATAmijet 1000 K – compact and lightweight

Hand-held guns for continuous coating of small parts of often complex geometrical nature need to meet a lot of specific requirements. They should be small and compact, offer a fine spray pattern and allow to be connected via pressure tanks, central material supply systems as well as diaphragm pumps.

The SATAmijet 1000 K series was especially developed for the industrial coating of small to medium sized lots of small parts under continuous conditions.

Fields of application:

- Industrial coating of small panels and housings
- Application of release agents
- Decorative painting, stage and interior design

Additional product features:

- “Super Speed”: RP® utilizes higher air cap pressure technology for maximum work speed, achieving transfer rates > 65%
- Narrow fan, fine atomization
- Ergonomic gun body and control elements
- Sturdy, easy clean surface
- Rapid air cap changes with only 2 turns due to coarse thread QC (Quick Change)
- CCS - Color Code System for easy personalization of your spray gun

SATAmijet 1000 H HVLP & RP

For lower volume applications the SATAmijet 1000 H is also available as siphon cup version.

This specialized gun is designed with an adapter for the SATA RPS cups to reduce the weight of the cup, and offer fatigue free handling. Adapters and conversion kits are available for all standard SATA RPS cups, for both 0.3 l, 0.6 l and 0.9 l sizes.

Air consumption: 7 cfm @ 36 psi Weight: 10.1 oz.
