Your spray gun, your **SATA universe.**

The SATAjet X 5500 universe -
Your portal to an exclusive world

The SATAjet X 5500 universe is the new special edition of SATA's premium spray gun. But it's also much more than that. It's your key to the SATA universe - a world of exclusive content, benefits and promotions. This universe is exclusively reserved for those who own a SATAjet X 5500 universe.

The promotion's QR code on the spray gun itself will grant you access to the universe portal, which is where you then enter the SAL number¹ of your SATAjet X 5500 universe. And voila, now you're part of the SATA universe, with access to plenty of exclusive content.

An online world full of exclusive content and benefits.

Access only via the SAL number of your SATAjet X 5500 universe.

- Raffles
- Sneak Previews
- Exclusive Content
- Newsletter
- Invitations
- and much more

The universe is expanding.

The SATA universe is regularly extended by new contents. The registration in the SATA universe does not oblige you to participate in certain offers or competitions. It offers you the chance to use the exclusive contents and to participate in the offered promotions.

Access to the SATA universe is exclusively available to persons who own or are the main users of a SATAjet X 5500 universe spray gun. Once a person has been registered in connection with a SAL number, it is no longer possible to transfer this access.

The SATAjet X 5500 universe is unique and limited. Available from your participating SATA dealer from September 25, 2023, while stocks last.

¹ The SATA Authentication Label is used to identify a SATA product as an original without any doubt via the SAL check. With the SATAjet X 5500 universe, the SAL number can do much more: It opens the access to the SATA universe. The SAL number is on the hologram security label on the packaging, just above the barcode. You will also find the number directly on your spray gun.

The special edition SATAjet X 5500 universe is available in the following nozzle sizes, as HVLP and RP and in standard or digital versions:

I-NOZZLE			O-NOZZLE			Clear Coat Edition
