

# SATA® air vision™ 5000

German Engineering

## Focus on breathing protection

### Hood cloth

Breathable, solvent-resistant, lint-free and flame retardant. Quick exchange due to velcro attachment system.

### Comfort head band

To ensure highest hygiene standards. Made of microfibre velour, dermatologically tested; can be exchanged within a few seconds only; includes foam insert for enhanced wearer comfort.

### SATA CCS discs

Allows the convenient individual identification to avoid confusion; available in 4 colours.

### Locking/pivot control

Allows easy visor location.

### Facial seals

Follows facial contours ensuring optimum seal and comfort. Low reflection due to dark colour.

### Diffusor block

Breathing air distribution reduces the noise level to 64 dB(A) at 2.5 bar inlet pressure.

### Hood

With rigid skull cover providing impact protection whilst working in confined areas.

### Headband

Can be adjusted at 4 different points ensuring perfect fit.

### Visor

With large field of vision

### Special single visor foil

To prevent reflections and distortions ensuring unrestricted view; quick and easy to exchange.

### Breathing air hose

for fresh air supply. Hose guide on the rear for maximum comfort.

### Acoustic warning signal

Instant indication of insufficient air supply.

### Plug-in diffuser

optional accessory – to avoid uncomfortable air flow.

### ■ SATA® air regulator belt™

Extra-large, comfortably cushioned belt allowing the individual adaptation and upgrade with additional modules, e.g. the SATA air humidifier™\*.

### ■ SATA® air regulator™

The SATA air (carbon) regulator can be swivelled and adjusted on the belt unit by up to +/- 45°.

\* expected availability as of 2015
