SATAjet® 5000 B Chopper – A Sensation of Freedom

Kornwestheim, September 2015

Following the market launch of the new high performance spray gun SATAjet 5000 B in the autumn of 2014, SATA now offer this spray gun model for the first time in a special surface design. The SATAjet 5000 B Chopper conveys a sensation of freedom and independence, attracting biker aficionados, fans of the movie blockbuster "Easy Rider", adventurers of any sort as well as people with gasoline running through their veins.

In line with any other of the previous special editions originating from the "Spray Gun Lab" in Kornwestheim/Germany, the SATAjet 5000 B Chopper, due to its special surface treatment, is a fully functional spray gun which is perfectly suited to the conditions seen in paint shops today. This special edition is available with either a sample set of three RPS disposable cups in the sizes of 0.3 l, 0.6 l, 0.9 l or with a reusable 0.6 l QCC hard cup. Painters have the choice between the "Super Saver" HVLP version and the "Super Speed" RP version in optimised high pressure technology. While the HVLP spray gun is offered in nozzle sizes ranging from 1.2 to 1.5, its RP counterpart comes in a range between 1.2 up to 1.8. Both are available in standard as well as DIGITAL versions.

As many painters however consider their SATA special editions too precious to paint with in the bodyshop, a lot of these spray guns are nowadays found in numerous showcases as a special collectors' item.

As with other special edition guns in previous years, the "Chopper" spray gun is offered as a strictly time-limited promotion. The SATAjet 5000 B Chopper is available with your SATA dealer from September 14 to October 31, 2015 – while supplies last.
